

To whom this may concern-

Hello my name is Aubri Munoz. I am 18 years old. I am a 2026 Mountain View graduate and both a 2024-25 digital Animation and 2025-26 Software and App Design graduates from EVIT. I will be heading to ASU in the fall of 2026 for an Animation degree. I am reaching out to you for your technical artist/ animator position.

I have experience with 4 coding languages. I have passed the TSA for both my courses at EVIT. I've gone through a total of 3 years of EVIT: 2 years of Digital Animation and 1 year of Software and App design. I have dabbled in both Blender and Maya so I can work with either one. I have created a fully rigged model in both programs. I have 4 certifications in coding languages: HTML & CSS, SQL Database, Java, and Python.

I have a very creative mind and have a great attention to detail. I would love to contribute to a big project with a team. I have passion for this craft so I'll be dedicated to work. I am an A's and B's student so I'll be just as hardworking as I was in school. I can adapt to your work environment and your work flow. I am a great collaborator that can bounce ideas off of other people and a great listener.

Thank you for your time and consideration. Please feel free to contact me via the social links on my resume for any further information you may need. I look forward to your response and discuss how my skills can contribute to your business.

Sincerely-

Aubri Munoz
